EYESHADOW

The next step in eye makeup. Getting to know your eye shape (be deep-set, wide-set, close-set, round, prominent, downturned, a combination between those) is important to properly pick the right that way to enhance your natural beauty with a flawless eye!

THE BASIC EYESHADOW TECHNIQUE

Now, I'll cover a basic eyeshadow technique that I consider both works well for most eye shapes!

- 1 Start by applying an eye primer
- 2 Next, take a transition shade and apply it directly for your eye. Blend it outwards until it disappears. Blend from outer to inner corner until it disappears.
- 3 After that, take a darker but still natural shade like a taupe and with a more precise pencil brush, apply it on the outer 1/3 of the eyelid.
- 4 Next, take a lighter shade (highlight shade) and apply it to the inner 1/3 of the eyelid.
- 5 To finish, highlight the brow bone and the inner corner of eye apply the highlighter brush on the bottom lashes area.

It's now up to you how far you want your eye to look. If desire for a darker look, and build that darkness on the outer corner.

Only Transition

You can mix and match this basic technique with the range of color of your preference, and recreate the look with purple, blue or pink for example!

PREP THE SKIN BEFORE MAKEUP

It is essential to have a clean, hydrated, and glowing skin before applying any makeup. Here are some steps to follow:

1. **Cleanse**: Use a gentle cleanser to remove any dirt, oil, or makeup from your skin.

- Soap-free cleanser
- Toner
- Moisturizer
- Face Oil
- Sunscreen

Do you need to do every single step every time you do your makeup?

The short answer is no, you don't have to do every single step every time you do your makeup. You can skip some steps depending on your skin type and the weather.

For example, if you have dry skin, you might want to skip the toner step. If you have oily skin, you might want to skip the moisturizer step.

So, it's all about knowing your skin and what you need to do to keep it healthy and glowing.

And it works as a base for your makeup.

Sunscreen is an essential step that we don't want to skip, even during the winter season.

The only exception is when we are doing makeup for night events.

We don't want to use sunscreen because it can make our face look white or patchy when we have makeup on.

The very next step, it's going to be primer. Make sure to use a primer according to your skin type.

The right shade for you.

There is a straightforward trick to identify your skin tone very quickly.

Find the natural light of the sun, and look at your arm, looking for your veins.

All the veins in humans are blue, but they can look like they are green, red, or purple. This is due to the way the light hits them and how they are exposed to the sun.

If your veins are blue and your skin has a yellow-orange undertone, your skin will have a fair complexion.

If you find your veins are purple and blue, you have a cool undertone. If your veins are blue and your skin has a yellow-orange undertone, your skin will have a fair complexion.

If your skin is very pale, you have a fair complexion. If your skin is very dark, you have a dark complexion.

In general, the perfect foundation shade for you is a shade similar to your skin tone with the same undertone.

Concealer

The key to concealer is to get more coverage, especially the dark under-eye area.

Use 1 or 2 drops of liquid concealer on the under-eye area and blend it out with your fingers.

Remember concealer and foundation are mixed up so they both are used to cover facial imperfections, but there are some key differences between the two.

- **Thickness**: Concealer is thicker than foundation.
- **Application**: Concealer is applied with a brush or sponge, while foundation is applied with a brush or sponge.
- **High coverage**: Concealer is designed to cover dark spots, blemishes, and redness. Foundation is designed to even out the skin tone and provide a smooth base for makeup.
- **Color**: Concealer comes in different shades to match skin tones, while foundation comes in shades to match skin tones.

Concealer Shade

Concealer should be lighter than your foundation only if you are applying it to bring light to certain areas like under the eyes, chin, bridge of your forehead, etc.

If you are trying to cover imperfections on the rest of the face, opt for a concealer in a similar shade to your foundation instead.

Concealer comes in different formulas such as cream, concealer, pencil, concealer, and the most popular one, liquid concealer.
