Handbook of Nature-Based Solutions to Mitigation and Adaptation to Climate Change Gustavo J. Nagy, Desalegn Yayeh Ayal, 2025-11-04 Over recent years nature based solutions NbS have gained popularity as tools to ameliorate the effects of climate change while slowing down the global warming process More specifically the potential of NbS has been explored in terms of meeting greenhouse gas emissions targets and fostering climate change adaptation NbS are methods that use and enhance nature to improve social and environmental challenges They involve several multifaceted actions that work sustainably to restore and protect the natural environment while helping people Therefore these solutions are useful in climate change adaptation and mitigation There are 3 main areas which NbS may target namely reducing exposure reducing sensitivity and supporting adaptive capacity Reducing exposure refers to protecting areas from existing climate change effects There is thus a perceived need to document and promote experiences related to NbS and to apply these in different contexts It is against this background that the Handbook of Nature Based Solutions to Mitigation and Adaptation to Climate Change is being produced The publication will showcase experiences related to NbS from around the world In particular it will gather examples of projects studies and the latest thinking on NbS which can serve the purpose of inspiring and fostering further works in this key area Thanks to its scope and thematic diversity the book will be of special interest to representatives from government organisations researchers and students from a wide range of natural and social sciences courses It will also provide useful information to practitioners and representatives from non governmental organisations

**Eco-Resilience: Climate Change, Land Degradation and Sustainable Solutions** Uday Chatterjee, Anitabha Ghosh, Sujit Kumar Roy, 2025-11-08 This book offers a critical and timely exploration of two of the most pressing environmental challenges of our time climate change and land degradation and the transformative role that eco resilience can play in addressing them As global environmental shifts intensify ecosystems livelihoods and development trajectories are increasingly at risk This volume responds to this urgency by positioning eco resilience the capacity of ecosystems to absorb shocks and maintain essential functions as a guiding principle for sustainable restoration and adaptive management Drawing upon multidisciplinary perspectives the book presents a well structured and accessible synthesis of cutting edge research real world case studies and policy insights from across the globe Organized into three thematic sections the book begins by establishing the foundational concepts and scientific understanding of the climate land nexus It then moves into detailed regional and global perspectives on climate induced land degradation highlighting vulnerable ecosystems and emerging trends The final section turns toward solutions showcasing community based practices technological innovations nature based strategies and inclusive governance models that promote long term ecological and socio economic resilience From the

wetlands of Cameroon to the urban landscapes of India from fragile hill ecosystems in the Nilgiris to coastal mangrove belts the case studies provide localized yet globally relevant insights Techniques like remote sensing GIS based suitability analysis RUSLE modeling and phenological monitoring are coupled with participatory approaches and traditional knowledge systems to create actionable adaptive pathways This book is designed for senior undergraduate and graduate students academic researchers policy makers and professionals in environmental sciences agriculture urban and regional planning civil and environmental engineering and climate policy It offers not only an in depth analysis of the drivers and consequences of climate change and land degradation but also a roadmap for building sustainable and resilient landscapes in the face of a rapidly changing planet Eco Resilience is more than a scholarly resource it is a call to action for a shared future where ecological integrity and human well being go hand in hand

**ECKM 2015 Proceedings of the 16th European Conference on Knowledge Management** Juan Gabriel Cegarra,2012 [Bio-based Solutions for Sustainable Development of Agriculture, Volume II](#) Eduardo V. Soares,Helena M. V. M. Soares,Spyridon Alexandros Petropoulos,2024-11-26

The agricultural industry is primarily driven by the fast growth of the population and the subsequent need to supply sufficient food globally It is estimated that the global population will expand from 8 billion to about 9 billion in 2050 and crop production needs to double in order to supply enough food for all people by 2050 Moreover the climate change and the intensification of areas of infertile and unproductive soil create new and additional difficulties It is urgent and of utter importance to find alternative practices to the traditional ones based on the indiscriminate use of various synthetic chemicals e g fertilizers and pesticides which are mainly used nowadays to overcome current and future agricultural challenges in a natural more efficient and sustainable way Recent regulations EU 1009 2019 and Farm Bill in EU and USA respectively promote the adoption of biostimulants in agriculture and open the market for new and innovative solutions This regulation is a major step forward that should encourage the scientific community in strict interaction with the industry in the continuous development of new bio based solutions for modern agriculture
