The Second Language Acquisition of French Tense, Aspect, Mood and Modality Dalila Ayoun, 2013-07-04. Temporal aspectual systems have a great potential of informing our understanding of the developing competence of second language learners. So far, the vast majority of empirical studies investigating L2 acquisition have largely focused on past temporality, neglecting the acquisition of the expression of the present and future temporalities, with rare exceptions aside from ESL learners leaving unanswered the question of how the investigation of different types of temporality may inform our understanding of the acquisition of temporal aspectual and mood systems as a whole. This monograph addresses this question by focusing on three main objectives: a) to contribute to the already impressive body of research in the L2 acquisition of tense, aspect, and mood/modality from a generative perspective, and in so doing, to present a more complete picture of the processes of L2 acquisition in general; b) to bridge the gap between linguistic theory and L2 acquisition; c) to make empirical findings more accessible to language instructors by proposing concrete pedagogical applications.

Pedagogical Norms for Second and Foreign Language Learning and Teaching Susan M. Gass, Kathleen Bardovi-Harlig, Sally Sieloff Magnan, Joel Walz, 2002-09-03 The concept of Pedagogical Norm is grounded in both sociolinguistic and psycholinguistic principles Pedagogical norms guide the selection and sequencing of target language features for language teaching and learning This book both situates and expands on this concept highlighting the interaction of research and pedagogy The papers collectively illustrate how the concept of pedagogical norm applies to all components of language including phonology morphology syntax and discourse The book
