It includes and summarizes all accepted papers from an interdisciplinary community which met traditionally at the annual Robotics in Education conference, making it a valuable resource for educators, researchers, scientists, and engineers. Without losing the focus on educational robotics, the topics have been carefully expanded this year. Therefore, the contributions range from theory to practice and from primary schools to university labs, while the content covers experience reports from out-of-school programs to didactic methodological approaches in teacher training and artificial intelligence to human-robotics interaction. Also, new robot designs, robot competitions, and aspects of maker spaces were considered. The anniversary edition of the conference took place from 10-12 April 2024 at the University of Koblenz in Germany.
