Ensnared between Hitler and Stalin David K Zimmerman,2022-12-21 In the 1930s hundreds of scientists and scholars fled Hitler's Germany. Many found safety but some made the disastrous decision to seek refuge in Stalin's Soviet Union. The vast majority of these refugee scholars were arrested, murdered, or forced to flee the Soviet Union during the Great Terror. Many of the survivors then found themselves embroiled in the Holocaust. *Ensnared between Hitler and Stalin* explores the forced migration of these displaced academics from Nazi Germany to the Soviet Union. The book follows the lives of thirty-six scholars through some of the most tumultuous events of the twentieth century. It reveals that not only did they endure the chaos that engulfed central Europe in the decades before Hitler came to power but they were also caught up in two of the greatest mass murders in history. David Zimmerman examines how those fleeing Hitler in their quests for safe harbour faced hardship and grave danger including arrest, torture, and execution by the Soviet state. Drawing on German, Russian, and English sources, *Ensnared between Hitler and Stalin* illustrates the complex paths taken by refugee scholars in flight.

The Eudaimonic Turn James O. Pawelski, D. J. Moores,2013 In much of the critical discourse of the seventies, eighties, and nineties, scholars employed suspicion in order to reveal a given text's complicity with various undesirable ideologies and/or psychopathologies. Construed as such interpretive practice was often intended to demystify texts and authors by demonstrating in them the presence of false consciousness, bourgeois values, patriarchy, orientalism, heterosexism, imperialist attitudes, and/or various neuroses, complexes, and lacks. While it proved to be of vital importance in literary studies, suspicious hermeneutics often compelled scholars to interpret eudaimonia, or well-being, variously conceived in pathologized terms. At the end of the twentieth century, however, literary scholars began to see the limitations of suspicion, conceived primarily as the discernment of latent realities beneath manifest illusions. In the last decade, often termed the post-theory era, there was a radical shift in focus as scholars began to recognize the inapplicability of suspicion as a critical framework for discussions of eudaimonic experiences, seeking out several alternative forms of critique, most of which can be called, despite their differences, a hermeneutics of affirmation. In such alternative reading strategies, scholars were able to explore configurations of eudaimonia not by dismissing them as

bad politics or psychopathology but in complex ways that have resulted in a new eudaimonic turn a trans disciplinary phenomenon that has also enriched several other disciplines The Eudaimonic Turn builds on such work offering a collection of essays intended to bolster the burgeoning critical framework in the fields of English Comparative Literature and Cultural Studies by stimulating discussions of well being in the post theory moment The volume consists of several examinations of literary and theoretical configurations of the following determinants of human subjectivity and the role these play in facilitating well being values race ethics morality aesthetics class ideology culture economics language gender spirituality sexuality nature and the body Many of the authors compellingly refute negativity bias and pathologized interpretations of eudaimonic experiences or conceptual models as they appear in literary texts or critical theories Some authors examine the eudaimonic outcomes of suffering marginalization hybridity oppression and or tragedy while others analyze the positive effects of positive affect Still others analyze the aesthetic response and or the reading process in inquiries into the role of language use and its impact on well being or they explore the complexities of strength resilience and other positive character traits in the face of struggle suffering and othering
