for the National Book Critics Circle Award An Instant New York Times Bestseller Named a Best Book of the Year by
Smithsonian Scientific American and Elle A bestselling page turner that has made waves not just in Silicon Valley but around
the world With *Empire of AI* Hao is fundamentally shaping many people s perceptions and understanding of the company at
the center of the AI revolution TIME Magazine TIME100 AI 2025 Excellent and deeply reported Tim Wu The New York Times
Startling and intensely researched an essential account of how OpenAI and ChatGPT came to be and the catastrophic places
they will likely take us Vulture From a brilliant longtime AI insider with intimate access to the world of Sam Altman s OpenAI
from the beginning an eye opening account of arguably the most fateful tech arms race in history reshaping the planet in real
time from the cockpit of the company that is driving the frenzy When AI expert and investigative journalist Karen Hao first
began covering OpenAI in 2019 she thought they were the good guys Founded as a nonprofit with safety enshrined as its
core mission the organization was meant its leader Sam Altman told us to act as a check against more purely mercantile and
potentially dangerous forces What could go wrong Over time Hao began to wrestle ever more deeply with that question
Increasingly she realized that the core truth of this massively disruptive sector is that its vision of success requires an almost
unprecedented amount of resources the compute power of high end chips and the processing capacity to create massive
large language models the sheer volume of data that needs to be amassed at scale the humans cleaning up that data for
sweatshop wages throughout the Global South and a truly alarming spike in the usage of energy and water underlying it all
The truth is that we have entered a new and ominous age of empire only a small handful of globally scaled companies can
even enter the field of play At the head of the pack with its ChatGPT breakthrough how would OpenAI resist such
temptations Spoiler alert it didn t Armed with Microsoft s billions OpenAI is setting a breakneck pace chased by a small
group of the most valuable companies in human history toward what end not even they can define All this time Hao has
maintained her deep sourcing within the company and the industry and so she was in intimate contact with the story that
shocked the entire tech industry Altman s sudden firing and triumphant return The behind the scenes story of what happened
told here in full for the first time is revelatory of who the people controlling this technology really are But this isn t just the
story of a single company however fascinating it is The g forces pressing down on the people of OpenAI are deforming the
judgment of everyone else too as such forces do Naked power finds the ideology to cloak itself no one thinks they re the bad

guy But in the meantime as Hao shows through intrepid reporting on the ground around the world the enormous wheels of extraction grind on By drawing on the viewpoints of Silicon Valley engineers Kenyan data laborers and Chilean water activists Hao presents the fullest picture of AI and its impact we've seen to date alongside a trenchant analysis of where things are headed An astonishing eyewitness view from both up in the command capsule of the new economy and down where the real suffering happens Empire of AI pierces the veil of the industry defining our era **Totalitarismo total**

Pedro Salazar Ugarte, 2026-03-10 Una reflexión urgente sobre los cambios que la IA está generando en las estructuras de poder la creatividad la guerra la responsabilidad y el amor En 2017 Vladimir Putin sentenció Quien domine la Inteligencia Artificial dominará el mundo Hace ocho años estas palabras podían sonar desmesuradas pero hoy en día reflejan una realidad escalofriante No por nada hay quienes comparan la carrera por la supremacía en el desarrollo de la Inteligencia Artificial con el proyecto Manhattan que produjo las primeras armas nucleares Es una carrera millonaria en la que participan Estados y empresas privadas y que cambiará para siempre ya lo está haciendo la forma como los seres humanos somos gobernados o dominados la forma como creamos y nos relacionamos con el arte nuestra concepción de la responsabilidad nuestra forma de hacer la guerra nuestra forma de amar Este libro aborda con profunda lucidez los desafíos que la Inteligencia Artificial plantea en estos ámbitos de la vida humana A nosotros no sabemos quién dominará la Inteligencia Artificial lo que sí sabemos advierte Pedro Salazar Ugarte es que el empuje tecnológico está impulsando la mayor concentración de poder en la historia El poder económico el poder político y el poder ideológico se funden en una peligrosa alianza totalitaria que amenaza las libertades de las personas Por ello este libro es también un llamado a imaginar maneras de regular el fuego prometeico de la IA para explotar sus enormes beneficios y mitigar sus numerosos riesgos **Apple**
