

# The United States of America

The United States of America is a country in North America. It is made up of 50 states. The capital of the United States is Washington D.C. The United States is a big country with many different types of landscapes, like mountains, forests, deserts, and beaches. The United States is also home to many different types of animals, like bears, eagles, and alligators.

The United States has a lot of history. The first people who lived in the United States were Native Americans. Later, people from Europe came to the United States and started colonies. The United States became an independent country in 1776. The first president of the United States was George Washington.

The United States is known for its culture, too. There are many different types of music that came from the United States, like jazz, blues, and rock and roll. The United States is also known for its food, like hamburgers, hot dogs, and apple pie. Every year, people from all over the world come to the United States to visit famous landmarks, like the Statue of Liberty, the Grand Canyon, and Disneyland.

Groisser, Sol Levine, 1987 **What makes written words so special to the brain?** Gui Xue, Urs Maurer, Mohamed L Seghier, 2015-01-22 Reading is an integral part of life in today's information driven societies Since the pioneering work of Dejerine on word blindness in brain lesioned patients the literature has increased exponentially from neuropsychological case reports to mechanistic accounts of word processing at the behavioural neurofunctional and computational levels tapping into diverse aspects of visual word processing These studies have revealed some exciting findings about visual word processing including how the brain learns to read how changes in literacy impact upon word processing strategies and whether word processing mechanisms vary across different alphabetic logographic or artificial writing systems Other studies have attempted to characterise typical and atypical word processes in special populations in order to explain why dyslexic brains struggle with words how multilingualism changes the way our brains see words and what the exact developmental signatures are that would shape the acquisition of reading skills Exciting new insights have also emerged from recent studies that have investigated word stimuli at the system network level by looking for instance at how the reading system interacts with other cognitive systems in a context dependent fashion how visual language stimuli are integrated into the speech processing streams how both left and right hemispheres cooperate and interact during word processing and what the exact contributions of subcortical and cerebellar regions to reading are The contributions to this Research Topic highlight the latest findings regarding the different issues mentioned above particularly how these findings can explain or model the different processes mechanisms pathways or cognitive strategies by which the human brain sees words The introductory editorial summarising the contributions included here highlights how varieties of

behavioural tests and neuroimaging techniques can be used to investigate word processing mechanisms across different alphabetic and logographic writing systems     *Crossroads, USA* Robert Hughes,1998 Articles selected to improve reading skills while learning about life in the United States Exercises help to understand the main points vocabulary and idioms The tapes feature readings of the articles to build listening comprehension and pronunciation skills     R.R.
