Master The Multiplication Tables Workbook:

Master the Multiplication Tables Workbook Maria Miller, 2016-01-15 The third grade workbook Master the Multiplication Tables concentrates on teaching the multiplication tables in a specific order It is a comprehensive teaching resource with lessons and exercises to introduce or review the multiplication tables The lessons include a way to drill a specific table but also have many other related exercises including word problems The book assumes that the students already know the concept of multiplication It is best preceded by my other workbook Multiplication Concept I have created a systematic approach to memorizing times tables In this method one table is studied at a time until it is mastered The individual tables are NOT studied in the order of 2 3 4 etc but instead the easy tables of 2 5 10 and 11 are studied first The study order also includes studying the table of 4 right after the table of 2 and studying the table of 6 right after the table of 3 because the skip counting patterns of those tables share some similarities The lessons emphasize the fact that one multiplication fact is always in two different tables This way when the student gets to the hardest tables the tables of 7 8 and 12 there are only a few totally new facts to learn We always start the study of each table by memorizing the skip counting pattern 7 14 21 28 etc Then we work on memorizing which fact is associated with which answer This way your students not only know what is 8×7 but also know all of it backwards that 56 is in the tables of 8 and 7 That knowledge will be an enormous help later when the students learn division factorizing and finding LCM s or GCF s The book also includes a 12x12 grid at the end of almost every lesson The boxes for those answers that have not been studied yet are shaded and are not to be filled Little by little the shaded areas become fewer and fewer and the progress is very visible to the student I encourage you also to use games for motivation and for practice I have included a list of online multiplication games for that purpose Of course board and card games are perfect as well However games are not enough in themselves The memorization also requires a mental effort from the student sitting down with the skip counting list then with the facts reading them and then trying to remember them The basic age old technique of covering the list and trying to remember it is still very effective I do not want to discount the value of songs or mnemonic devices but they tend to isolate the facts in the child s mind as separate odd trivia This book shows the patterns found in the multiplication tables in order to keep the facts in a structured context and emphasizes learning the tables backwards in order to facilitate learning division The book also includes a guide for the teacher titled Effective Oral Drilling This drilling is structured not random and is based on the pattern in the table itself Table of 2 11 new facts to learn Table of 4 10 new facts These are doubles of those in the table of two Table of 10 9 easy facts Table of 5 8 new facts More Practice and Review is a break from memorizing new tables Table of 3 7 new facts Table of 6 6 new facts These are doubles of those in the table of 3 Table of 11 5 new facts four of them are easy Table of 9 4 new facts Table of 7 3 new facts Table of 8 2 new facts Table of 12 1 new fact

Luria's sociocultural theory and their principle of a systemic structure and dynamic organization of higher mental functions. They focus on the interactive scaffolding of the weak components of the child's functional systems, the transition from joint child-adult co-actions, and the emotional involvement of the child. The authors discuss effective ways to remediate issues with attention, executive functions, working memory, and cognitive control, and spatial and visual-verbal functions. *Overcoming Learning Disabilities* translates complex problems into easily understandable concepts useful to school psychologists, special and general education teachers, and parents of children with learning disabilities.
