## Matemáticas Ccss Ii Anaya:

*Matemáticas aplicadas a las Ciencias Sociales* Miguel Ángel Navarro Fernández, 2007      *Resúmenes de matemáticas aplicadas a las ciencias sociales II con notas históricas* Antonio Cipriano Santiago Zaragoza, 2011-01-01 PR LOGO En esta colección se produce una interesante colaboración entre las Matemáticas y su Historia correspondiendo a Antonio Cipriano el desarrollo de los contenidos matemáticos y el prólogo de este volumen y a María José Labaqueda y puesta al día de las anotaciones históricas Este libro que a priori no es un manual autosuficiente comienza su andadura de forma fragmentaria por una parte tienen a su vez diversos resúmenes de las unidades por otra abundantes relaciones de ejercicios y por último notas históricas sobre el desarrollo de algunos temas de la materia Con el paso del tiempo reuní las dos primeras partes porque me resultaba más cómodo para las clases y empecé a trabajar ese prelibro con los alumnos Como resultado de este trabajo reorganicé adhiriendo ideas diversas a veces matices o secciones completas No ha sido hasta este año cuando a principio de curso decidí darle forma definitiva a todo el material y añadir las notas históricas que había redactado María José Desde esta perspectiva era para mí una experiencia nueva presentar a los alumnos un libro de matemáticas con reseñas históricas y mi sorpresa ha sido mayúscula porque ha tenido muy buena acogida entre ellos y aunque por las exigencias de la programación no todas las reseñas se han podido leer y comentar en clase creo que su inclusión ha sido un acierto pues los alumnos a medida que las leían comentaban algunos datos o detalles curiosos y su interés me animaba a leer más sobre la Historia de las Matemáticas que me entusiasma y a María José a documentarse y escribir más apartados apasionantes en los que se narran algunos acontecimientos de la historia matemática y se habla de sus creadores los matemáticos esa especie de seres raros a los que les gusta llenar pizarras y hojas en blanco de símbolos que en general para el resto de los seres no dejan de ser signos sin sentido y sobre todo a los que no se les ve una utilidad clara y de las ideas los conceptos matemáticos      Resúmenes de matemáticas aplicadas a las ciencias sociales I con notas históricas Antonio Cipriano Santiago Zaragoza, 2011-01-01 PR LOGO En esta colección se produce una interesante colaboración entre las Matemáticas y su Historia correspondiendo a Antonio Cipriano el desarrollo de los contenidos matemáticos y a María José Labaqueda y puesta al día de las anotaciones históricas Para seguir con aprovechamiento el contenido de este libro basta con tener algunas ideas claras en relación con las matemáticas estudiadas en la ESO Las introducciones históricas que acompañan a la mayoría de los resúmenes se quiere que cumplan un doble objetivo por una parte mostrar esa otra parte de la historia que nunca se estudia la historia de la ciencia en particular de las matemáticas y por otra mostrar esta ciencia como algo vivo en constante cambio ya que da la impresión cuando se estudian matemáticas que las propiedades operaciones y problemas que estudia esta disciplina son siempre los mismos Sin embargo algo tan nimio y sin importancia para nosotros como es el uso del cero no comenzó a ser aceptado en Europa hasta el S XIII si bien los mayas lo usaban en el S I a C Este es sólo un ejemplo pero el libro está lleno de curiosidades como esta que tratan de enganchar al lector      **álgebra** ,      **Geometría Analítica** ,      **Funciones** , 1994      **Pruebas de**

**selectividad en Matemáticas en la UPV-EHU. Resultados y opiniones de los profesores** Ruiz de Gauna Gorostiza, Josu, Dávila Balsera, Paulí, Etxeberria Murgiondo, Juan, Sarasua Fernández, José María, El Libro español, 1982
