Problem

Problem 1:

- (a) Plot the result of convolving a one-dimensional function consisting of three impulses with a triangular function as shown below:

- (b) Plot the result of convolving a one-dimensional function consisting of a rectangular function with the same triangular function used in part(a), as shown below:

- (c) Plot the result of convolving a pair of identical even "top-hat" (pulse) functions: $f(t) = 1$ for $|t| < T/2$ and $f(t) = 0$ otherwise. Use your result show that the Fourier transform of a triangular pulse (such as used in parts (a) and (b)) is of the form $(\sin(x)/x)^2$.

Problem 2: Show that when two gaussian functions

$$f_1(x) = e^{-ax^2}$$
$$f_2(x) = e^{-bx^2}$$

are convolved, the result is another gaussian function.

Hint: Complete the square in the exponent, change the variable of integration, and recognize that

$$\int_{-\infty}^{\infty} e^{-x^2} dx = \sqrt{\pi}$$

MATLAB Primer Timothy A. Davis, 2010-08-18 Highlighting the new aspects of MATLAB 7.10 and expanding on many existing features this eighth edition continues to offer a hands on step by step introduction to using the powerful tools of MATLAB It includes a new chapter on object oriented programming a new discussion of the MATLAB File Exchange window major changes to the MATLAB Editor and an explanation of more powerful Help tools It also presents a synopsis of the most frequently used functions operators and special characters providing quick and easy access to frequently used information M files and MEX files for large examples are available at www.crcpress.com **The Analysis and Design of Linear Circuits**

Roland E. Thomas, Albert J. Rosa, Gregory J. Toussaint, 2016-01-05 The Analysis and Design of Linear Circuits 8th Edition provides an introduction to the analysis design and evaluation of electric circuits focusing on developing the learners design intuition The text emphasizes the use of computers to assist in design and evaluation Early introduction to circuit design motivates the student to create circuit solutions and optimize designs based on real world constraints This text is an unbound three hole punched version **Teaching and Learning Mathematics Online** James P. Howard, II, John F.

Beyers, 2020-05-10 Online education has become a major component of higher education worldwide In mathematics and statistics courses there exists a number of challenges that are unique to the teaching and learning of mathematics and statistics in an online environment These challenges are deeply connected to already existing difficulties related to math anxiety conceptual understanding of mathematical ideas communicating mathematically and the appropriate use of technology Teaching and Learning Mathematics Online bridges these issues by presenting meaningful and practical solutions for teaching mathematics and statistics online It focuses on the problems observed by mathematics instructors currently working in the field who strive to hone their craft and share best practices with our professional community The book provides a set of standard practices improving the quality of online teaching and the learning of mathematics Instructors will benefit from learning new techniques and approaches to delivering content Features Based on the experiences of working educators in the field Assimilates the latest technology developments for interactive distance education Focuses on mathematical education for developing early mathematics courses **Operations and Production Systems with Multiple Objectives**

Behnam Malakooti, 2014-02-03 The first comprehensive book to uniquely combine the three fields of systems engineering operations production systems and multiple criteria decision making optimization Systems engineering is the art and science of designing engineering and building complex systems combining art science management and engineering disciplines Operations and Production Systems with Multiple Objectives covers all classical topics of operations and production systems as well as new topics not seen in any similar textbooks before small scale design of cellular systems large scale design of complex systems clustering productivity and efficiency measurements and energy systems Filled with completely new perspectives paradigms and robust methods of solving classic and modern problems the book includes

numerous examples and sample spreadsheets for solving each problem a solutions manual and a book companion site complete with worked examples and supplemental articles Operations and Production Systems with Multiple Objectives will teach readers How operations and production systems are designed and planned How operations and production systems are engineered and optimized How to formulate and solve manufacturing systems problems How to model and solve interdisciplinary and systems engineering problems How to solve decision problems with multiple and conflicting objectives This book is ideal for senior undergraduate MS and PhD graduate students in all fields of engineering business and management as well as practitioners and researchers in systems engineering operations production and manufacturing
