A Review of Mortgage Servicing Practices and Foreclosure Mitigation United States. Congress. House. Committee on Financial Services,2008

New York Court of Appeals. Records and Briefs. New York (State)., **Housing Affordability: A New Dataset** Nina Biljanovska,Mr. Chenxu Fu,Ms. Deniz O Igan,2023-12 The rapid increase in house prices in the past few years including during the COVID 19 pandemic raises concerns about housing affordability The price to income ratio is a widely used indicator of affordability but does not take into account important factors such as the cost of financing The aim of this paper is to construct a measure of housing affordability that takes these factors into account for a large set of countries and long period of time The resulting dataset covers an unbalanced panel of 40 countries over the period from 1970Q1 to 2021Q4 For each country the index measures the extent to which a median income household can qualify for a mortgage loan to purchase an average priced home To gauge the performance of the constructed indices we compare them to other readily available measures of affordability and examine the evolution of the indices over time to understand the relevant drivers including in a regression analysis to assess the extent to which government housing programs could contribute to improving affordability
