in human history toward what end not even they can define All this time Hao has maintained her deep sourcing within the company and the industry and so she was in intimate contact with the story that shocked the entire tech industry Altman's sudden firing and triumphant return The behind the scenes story of what happened told here in full for the first time is revelatory of who the people controlling this technology really are But this isn't just the story of a single company however fascinating it is The g forces pressing down on the people of OpenAI are deforming the judgment of everyone else too as such forces do Naked power finds the ideology to cloak itself no one thinks they're the bad guy But in the meantime as Hao shows through intrepid reporting on the ground around the world the enormous wheels of extraction grind on By drawing on the viewpoints of Silicon Valley engineers Kenyan data laborers and Chilean water activists Hao presents the fullest picture of AI and its impact we've seen to date alongside a trenchant analysis of where things are headed An astonishing eyewitness view from both up in the command capsule of the new economy and down where the real suffering happens Empire of AI pierces the veil of the industry defining our era

**Four Battlegrounds** Paul Scharre, 2023-02-28 An NPR 2023 Books We Love Pick One of the Next Big Idea Club's Must Read Books An invaluable primer to arguably the most important driver of change for our future P W Singer author of *Burn In* An award winning defense expert tells the story of today's great power rivalry the struggle to control artificial intelligence A new industrial revolution has begun Like mechanization or electricity before it artificial intelligence will touch every aspect of our lives and cause profound disruptions in the balance of global power especially among the AI superpowers China the United States and Europe Autonomous weapons expert Paul Scharre takes readers inside the fierce competition to develop and implement this game changing technology and dominate the future **Four Battlegrounds** argues that four key elements define this struggle

data computing power talent and institutions Data is a vital resource like coal or oil but it must be collected and refined  
Advanced computer chips are the essence of computing power control over chip supply chains grants leverage over rivals  
Talent is about people which country attracts the best researchers and most advanced technology companies The fourth  
battlefield is maybe the most critical the ultimate global leader in AI will have institutions that effectively incorporate AI into  
their economy society and especially their military Scharre s account surges with futuristic technology He explores the ways  
AI systems are already discovering new strategies via millions of war game simulations developing combat tactics better than  
any human tracking billions of people using biometrics and subtly controlling information with secret algorithms He visits  
China s National Team of leading AI companies to show the chilling synergy between China s government private sector and  
surveillance state He interviews Pentagon leadership and tours U S Defense Department offices in Silicon Valley revealing  
deep tensions between the military and tech giants who control data chips and talent Yet he concludes that those tensions  
inherent to our democratic system create resilience and resistance to autocracy in the face of overwhelmingly powerful  
technology Engaging and direct Four Battlegrounds offers a vivid picture of how AI is transforming warfare global security  
and the future of human freedom and what it will take for democracies to remain at the forefront of the world order
