Lean Thinking James Womack :

Lean Thinking, 1st Ed. James P. Womack, Daniel T. Jones, 1996-08 In the search for ever greater profits efficiency downsizing and re engineering are inadequate The authors maintain that Lean Thinking can improve a company through a series of simple ideas and a new concept of the meaning of value

Lean Thinking James P. Womack, Daniel T. Jones, 2013-09-26 Lean Thinking was launched in the fall of 1996 just in time for the recession of 1997 It told the story of how American European and Japanese firms applied a simple set of principles called lean thinking to survive the recession of 1991 and grow steadily in sales and profits through 1996 Even though the recession of 1997 never happened companies were starving for information on how to make themselves leaner and more efficient Now we are dealing with the recession of 2001 and the financial meltdown of 2002 So what happened to the exemplar firms profiled in Lean Thinking In the new fully revised edition of this bestselling book those pioneering lean thinkers are brought up to date Authors James Womack and Daniel Jones offer new guidelines for lean thinking firms and bring their groundbreaking practices to a brand new generation of companies that are looking to stay one step ahead of the competition

Lean Solutions Daniel T. Jones, James P. Womack, 2013-09-12 A massive disconnect exists today between consumers and providers As consumers we have a greater selection of higher quality goods and services to choose from yet our experience of obtaining and using these items is more frustrating than ever At the same time companies find themselves with declining customer loyalty greater challenges in fulfilling orders and a general sense of dissatisfaction in connecting with their customers In LEAN SOLUTIONS lean production experts Womack and Jones show consumers and companies alike how they can align their goals to achieve greater value with less waste

as a system of tools for sustainable improvement **Strategic Lean Thinking and Value Management for Gravel Roads
in Zambia** Richard Kasongo,2015-11-25 Doctoral Thesis Dissertation from the year 2015 in the subject Engineering General
course Civil Engineering Management Construction Project Management language English abstract This research topic is
entitled Strategic Lean Thinking and Value Management for Gravel Roads The study captured 82 respondents as research
sample to a case study of Output Performance Based Contracts OPRCs for the Construction and Maintenance of Gravel Roads
in Zambia Purposive sampling was used as most research participants were drawn from second generation OPRCs that were
active between 2009 and 2014 The study was aimed at devising new Construction and Maintenance Contract methods for
gravel roads that are based on Lean Thinking and Value Management philosophies in Zambia The established
epistemological background to the study is that most of the Zambian road network is of gravel or earth standards and is
therefore imperative that they are well maintained to attain desired service levels to properly serve the intended
beneficiaries the road users The Road Development Agency Annual Report of 2009 indicated that 33 000 Km of the total 40
671 Km core road network is classified as gravel roads unpaved which are at the moment mostly in a deteriorated state The
study revealed that currently in Zambia Gravel Road Construction projects are commonly being realised through the use of
traditional Contracts such as admeasured by the use of Bills of Quantities BOQs the Lump sum and Cost plus etc These are
mainly short term form of Contracts which to some extent lack some components of sustainable maintenance regimes

thereby rendering the Government and other Promoters efforts futile as gravel roads sooner or later deteriorate just after the first rain season upon their construction This was theoretical perspective which served as driver to the Research problem The study noted that current forms of Contracts did not inspire and spur the spirit of ownership as the local people were left out in the planning and design stages of gravel road projects Despite all the attempts made by Government through the RDA and other implementing Agencies the Road Construction Industry in general has failed to get the best value for money through the use of these conventional types of Contracts One of the reasons for this failure according to Womack and Jones 2003 is that it is hard to define and realise value this is partly because most Producers Road Contractors want to make what they are already making and partly because Customers only know some variant of what they are already getting
