**Projections (years 2015-2030)** Eleftheria Kontou (Ph.D.), Marc W. Melaina, Aaron Brooker, National Renewable Energy Laboratory (U.S.), 2018 International Arbitration in the Energy Sector Maxi Scherer, 2018-02-22 Disputes in the energy and natural resources sector are at the heart of international arbitration. With more arbitrations arising in the international energy sector than in any other sector, it is not surprising that the highest valued awards in the history of arbitration come from energy related arbitrations. Energy disputes often involve complex and controversial issues relating to security, sovereignty and public welfare. International Arbitration in the Energy Sector puts international energy disputes into a global context, providing broad coverage of different forms and systems of dispute resolution across both renewable and non-renewable sectors. With contributions from leading arbitrators, academics and industry experts from across the globe, the twenty chapters in the book enable readers to compare the approaches to and learnings from energy arbitrations across various legal systems and geographic regions. After outlining the international energy arbitration legal framework in Part I, the text delves into a detailed analysis of the problems which regularly arise in practice. These include, among other things, commercial disputes in Part II (e.g. over the upstream oil sector and long term gas supply contracts), investor state disputes in Part III (e.g. under the Energy Charter Treaty and public international law), disputes in Part IV (e.g. concerning international boundaries and the distribution of natural resources). Alongside recent developments in the international energy sector, attention is given to climate and sustainable development disputes which raise important questions about enforcing sustainability objectives on individuals, corporations and states. Backed by analyses of arbitral awards, national court and international tribunal decisions, treaties and other international legal instruments, as well as current events and news in the energy industry, this text offers a unique contribution to international energy literature and provides insightful commentary on the prevalent issues in the field. It is essential reading for any practitioner or researcher in the energy and natural resources sector. Asian Development Outlook, 2018 **Outlook for Economic Activity and Prices**, 2015
