*The De Gruyter Handbook of Automated Futures* Vaike Fors, Martin Berg, Meike Brodersen, 2024-09-23 How does automation affect us our environment and our imaginations What actions should we take in response to automation Beyond grand narratives and technology driven visions of the future what more can automation offer With these questions in mind The De Gruyter Handbook of Automated Futures provides a framework for thinking about and implementing automation differently It consolidates automated futures as an inter and transdisciplinary research field embedding the imaginaries interactions and impacts of automation technology within their social historical societal cultural and political contexts Promoting a critical yet constructive and engaging agenda the handbook invites readers to collaborate with rather than resist automation agendas It does so by pushing the agenda for social science humanities and design beyond merely assessing and evaluating existing technologies Instead the handbook demonstrates how the humanities and social sciences are essential to the design and governance of sustainable sociotechnical systems Methodologically the handbook is underpinned by a pedagogical approach to staging co learning and co creation of automated futures with rather than simply for people In this way the handbook encourages readers to explore new and alternative modes of research fostering a deeper engagement with the evolving landscape of automation

Digital Marketing Strategies for Value Co-creation Wilson Ozuem, Michelle Willis, 2022-03-21 Online brand communities OBCs are hugely important in the development of marketing strategy but it is unclear how marketers can effectively utilise these platforms to enhance and develop consumer engagement For an online brand community to be successful it should allow members to feel a connection to the brand and with other members while forming a disconnection from those not belonging to the community It should also have rituals and traditions that join members together over a revered commonality and moral responsibility in contributing to the community Indeed brands play active roles in securing degrees of activity in OBCs through content that

offers members the quality of engagement they seek This book focuses on contemporary digital marketing issues in OBCs offering a comprehensive examination of consumers response to active engagement in such communities It discusses how brands can tap into the various levels of participation engagement and online conversations in the development of marketing strategy and ultimately examines how an online brand community strengthens value co creation Balancing theory with practical approaches this book gives serious treatment to an important yet until now overlooked area of digital marketing strategy providing an important resource for scholars students and practitioners
