International Development Ideas Experience And Prospects:

International Development Bruce Currie-Alder, Ravi Kanbur, David M. Malone, Rohinton Medhora, 2014-02-27 Thinking on development informs and inspires the actions of people organizations and states in their continuous effort to invent a better world This volume examines the ideas behind development their origins how they have changed and spread over time and how they may evolve over the coming decades It also examines how the real life experiences of different countries and organizations have been inspired by and contributed to thinking on development The extent to which development works depends in part on particular local historical or institutional contexts General policy prescriptions fail when the necessary conditions that make them work are either absent ignored or poorly understood There is a need to grasp how people understand their own development experience If the countries of the world are varied in every way from their initial conditions to the degree of their openness to outside money and influence and success is not centred in any one group it stands to reason that there cannot be a single recipe for development Each chapter provides an analytical survey of thinking about development that highlights debates and takes into account critical perspectives It includes contributions from scholars and practitioners from the global North and the global South spanning at least two generations and multiple disciplines It will be a key reference on the concepts and theories of development their origins evolution and trajectories and act as a resource for scholars graduate students and practitioners

The Rule of Law in International Development
Michael C. Leach, 2026-03-13 This book examines how the concept of the Rule of Law has been used in the field of international development over the past three decades In the early 1990s the field of international development turned to law as a tool for socio political transformation and economic reform Within time the legal philosophical notion of the Rule of Law emerged as the primary conceptual frame for that work Although the Rule of Law is typically promoted as a transcendent and universal value development workers often express frustration with how hard it is to make sense of it in any specific or practical way This makes it a paradox for any who work with it while it is ubiquitous throughout international development policy and project work it is also maddeningly elusive for those tasked with promoting it in practice This book treats this paradox as an invitation to ask empirical questions about how development actors make use of the Rule of Law and what it means for them Rather than trying to resolve this paradox with a new definition or conceptualization the book instead argues that the Rule of Law became a powerful concept in development work because of not despite its lack of precise meaning

Informed by interviews with Rule of Law professionals it challenges prevailing assumptions that value laden concepts like the Rule of Law do the work of framing international development practices Instead it demonstrates that the relationship between concept and practice is better understood inversely it is international development itself that frames how the Rule of Law has been rendered meaningful and meaningless in practice and that its many apparent paradoxes are a product of this

Villarreal,2017 There is mounting empirical evidence that the responsible provision and use of formal financial services have a positive impact on household well being and enterprise performance At the individual level financial inclusion benefits rural households and small producers by facilitating the safe accumulation of assets enabling them to leverage those assets in order to invest in human and physical capital and supporting better risk management The positive effects at the aggregate level are associated with better allocation of scarce resources among different activities Despite recent progress on different aspects of financial inclusion in Latin America and the Caribbean large gaps remain especially in rural areas which have been historically neglected by traditional providers of financial services This book describes how these gaps have evolved recently in five countries Costa Rica the Dominican Republic El Salvador Honduras and Mexico that are at different stages of designing and implementing comprehensive financial inclusion strategies Then on the basis of a comparative analysis of the institutional architecture available it identifies the main barriers preventing small rural producers from accessing and making effective use of the various financial services on offer with a view to making policy recommendations for overcoming these limitations Research Report, Publication List Massachusetts Institute of Technology.
