Cumulative Book Index ,1998 A world list of books in the English language Rational Expectations Models with a Continuum of Convergent Solutions Michael Mussa,1984 This paper examines five examples of rational expectations models with a continuum of convergent solutions and demonstrates serious difficulties in the economic interpretation of these solutions The five examples are 1 a model of optimal capital accumulation with a negative rate of time preference 2 Taylor s 1977 linear rational expectations model of macroeconomic equilibrium 3 Calvo s 1984 model of contract setting and price dynamics 4 Obstfeld s 1984 equilibrium model of monetary dynamics with individual optimizing agents and 5 Calvo s 1978 life cycle model of savings and asset valuation In every case when these models yield a continuum of convergent infinite horizon solutions these solutions fail to exhibit economically appropriate forward looking dependence of the endogenous variables on the paths of the exogenous forcing variables a difficulty that does not arise under the circumstances where these models yield unique convergent infinite horizon solutions Further the three models that have natural finite horizon versions either lack finite horizon solutions or have solutions that do not converge to any of the infinite horizon solutions Again this difficulty arises only under the circumstances where these models have a continuum of infinite horizon solutions
